

A close-up photograph of pink flowers, likely a species of rose or similar, with delicate petals and visible stamens. The image is partially obscured by a dark purple overlay at the bottom.

Harmful Snakes, Spiders and Poisonous Plants

PRESENTED BY DON CRIM,
WYANDOTTE COUNTY EMG SINCE 2001

Thursday, August 3– 11:30 am

WYANDOTTE COUNTY EXTENSION OFFICE:
1208 N 79TH ST. KCK 66112

In this presentation Don will identify the six venomous snakes found in Kansas. There are 40 snake species found in Kansas but only 5 venomous snakes are native to Kansas. He will show physical characteristics to identify these snakes. He will give information on what to do if bitten by these venomous snakes. Don will discuss harmful spiders found in Kansas and how to identify them. There will be a listing of harmful plants to humans, including mushrooms and some household plants.
